-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is vague and indefinite what type of apparatus is intended by the claimed "touch probe".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9, 26-36 and 48-49 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Marouiss et al. (2001/0048899).

Mauouiss et al. teach an integrated sample processing system(500) comprising a plurality of modules further comprising at least one sample input/output site(502), a transport module(504), a fluidics module(506) and an analysis module(508).

Paragraph[070] teaches sample holders that have been read on the claimed "substrate mount for receiving a substrate". Paragraph[0105] teaches a transport module for the movement of the sample holders that has been read on the claimed "a touch system for positioning the substrate". Paragraph[0158] teaches a fluidic module for the dispensing

of fluid to the sample holder that has been read on the claimed "dispensing device".

Paragraphs[0218-0223] teach the rotation of the dispensing device which has been read on the claimed "dispensing device is adapted for translation along a y-axis and for rotation about a central axis ...". Paragraphs[0268+] teach an optical system that has been read on the claimed "optical system". Paragraph[0324] teaches control of the sample holders/microplate by optical analysis.

Response to Arguments

Applicant's arguments with respect to claims 1-9 and 26-36 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lyle A. Alexander whose telephone number is 571-272-1254. The examiner can normally be reached on Monday, Wednesday and Friday.
